Sauget Sites (Area I) -- Sauget  
Superfund/General Correspondence

December 7, 1992

Mr. Bryan K. Williams  
Landmark Agri Management, Inc.  
1 Fulton Avenue  
Shawneetown, Illinois 62984

Dear Bryan:

As we had spoken over the phone last week, I indicated that the Illinois Environmental Protection Agency (IEPA) does not currently plan to include areas of Parks Airport in our future studies at the Sauget Sites. Our main concern in Area I (see attached map) is to fully characterize source areas near and including Dead Creek and evaluate what health and environmental impacts exist so that an appropriate remedy can be implemented.

Regarding your inquiry about how this agency has historically handled pollution problems from non-point source areas, it has not been the intent of IEPA to pursue landowners who did not in any way contribute to a contamination problem and whose property in fact shows only groundwater contamination originating from source areas off their properties.

Please keep in mind, however that this letter should not be construed as a waiver of future environmental liability for the property you inquired about. If you have any questions or concerns about this or need further information about the Sauget Sites, do not hesitate to call.

Sincerely,

Paul E. Takacs, Project Manager  
Federal Sites Management Unit  
Division of Remediation Management  
Bureau of Land
